Matrix USA Inc. Expands its Business to California

Friday, April 15, 2005

Matrix USA Inc. today announced that it is making a major expansion of its North American business base into California. Mr. Marv Bain, former President of Circuit Image Systems Inc., will assume the operational leadership role for the new venture. Mr. Bain has over 20 years experience in the PWB industry. His first responsibility will be to immediately establish a value-add finishing facility in the Santa Ana region to convert and tool PWB raw materials.

"We are delighted to expand our product offering into this region and to attract someone with Mr. Bain's credentials to our organization. We believe that his background will help us further optimize our operations in the region", said Kieran Healy, Matrix USA's President. "Matrix is now committed to the entire North American PWB industry with value-added facilities, sales and technical support coverage".

Matrix has been in the value-added and distribution business since 1977. Over recent years, Matrix has setup warehousing and conversion facilities in the Eastern and Midwestern USA. For more information about the company, their products and their world-class Principals, refer to www.matrixusa.us.
